College Code: 146

Department: Bsc. Computer Science

Title: Streamlining It Procurement: Automating Standard Laptop Orders With Flow Designer

PHASE 1 – BRAINSTORMING & IDEATION

1. Project Title

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

2. Problem Statement

The current IT procurement process for standard laptop orders involves manual work and may cause delays in configuring laptops. Requests may require configuration, but this step can be overlooked or delayed. This can increase user waiting time and create additional work for the IT department.

3. User Story

As a member of the IT procurement team, I want a streamlined process for ordering standard laptops so that configuration tasks are automatically generated and assigned to the Hardware team. This helps ensure that laptops are configured promptly and reduces manual intervention.

4. Proposed Solution

The proposed solution is to use **ServiceNow Flow Designer** to automate the standard laptop procurement process.

When a Standard Laptop request is approved, the Flow automatically creates a **Catalog Task** and assigns it to the **Hardware** group for configuration.

5. Project Objectives

The main objectives of the project are:

1. To provide a seamless process for users requesting standard laptops.
2. To reduce manual intervention in the procurement process.
3. To reduce potential errors.
4. To automatically assign configuration tasks to the Hardware team.
5. To improve resource utilisation within the IT department.
6. To improve efficiency and productivity in IT procurement.

6. Basic Workflow

User Request

↓

Standard Laptop

↓

Order Now

↓

Approval

↓

Flow Designer

↓

Create Catalog Task

↓

Assign to Hardware

↓

Laptop Configuration

7. Expected Outcome

After implementation, an approved Standard Laptop request should automatically generate a Catalog Task with the required configuration information and assign the task to the **Hardware** group.

8. Technologies Used

- **ServiceNow**
- **Flow Designer**
- **Service Catalog**
- **Catalog Task**

9. Conclusion

The proposed automation will streamline the standard laptop procurement process by reducing manual work and helping the Hardware team receive configuration tasks promptly.
