PHASE 5 – PROJECT DEVELOPMENT

1. Project Title

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

2. Development Overview

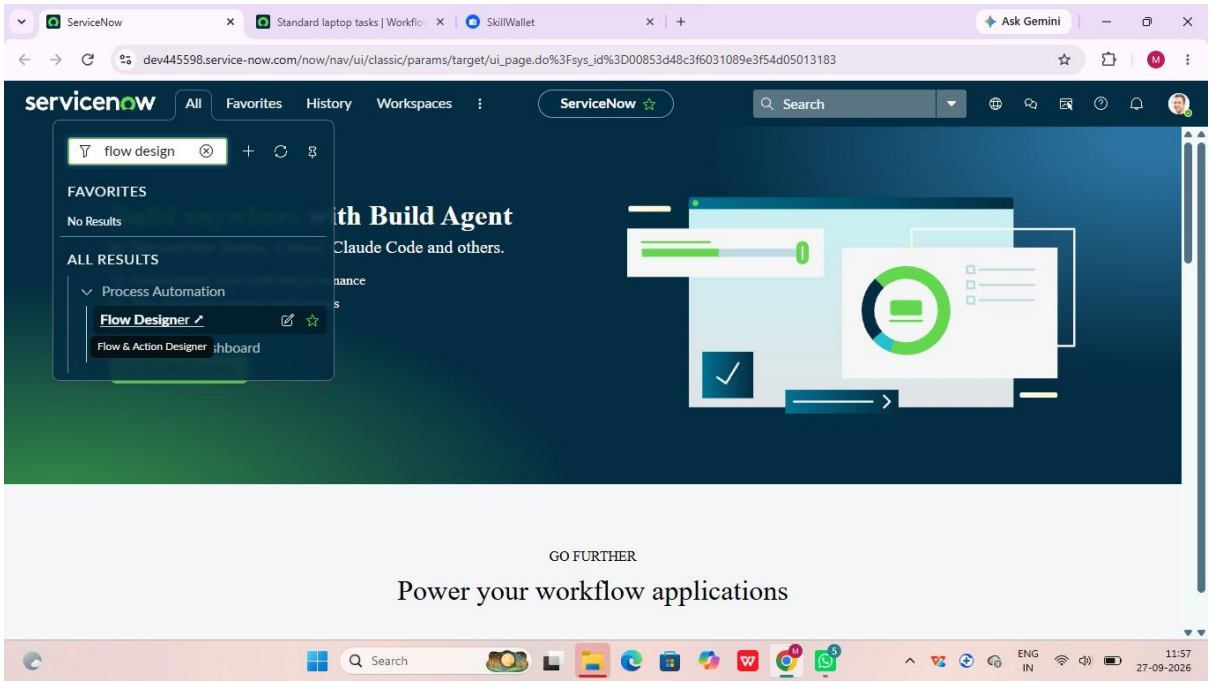

The project is developed using **ServiceNow Flow Designer** to automate the process of creating configuration tasks for Standard Laptop requests.

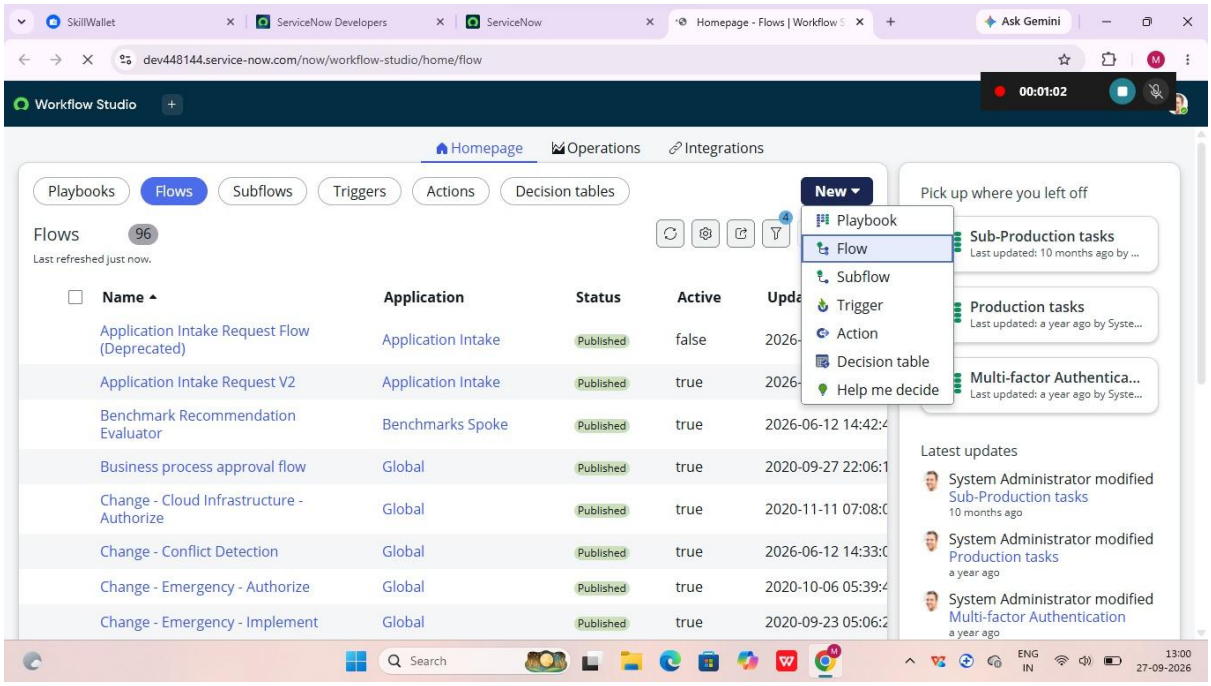

The development is completed in three milestones.

3. Development Milestone 1 – Creating the Flow

Step 1: Create a New Flow

Open **ServiceNow → Flow Designer → New → Flow**.

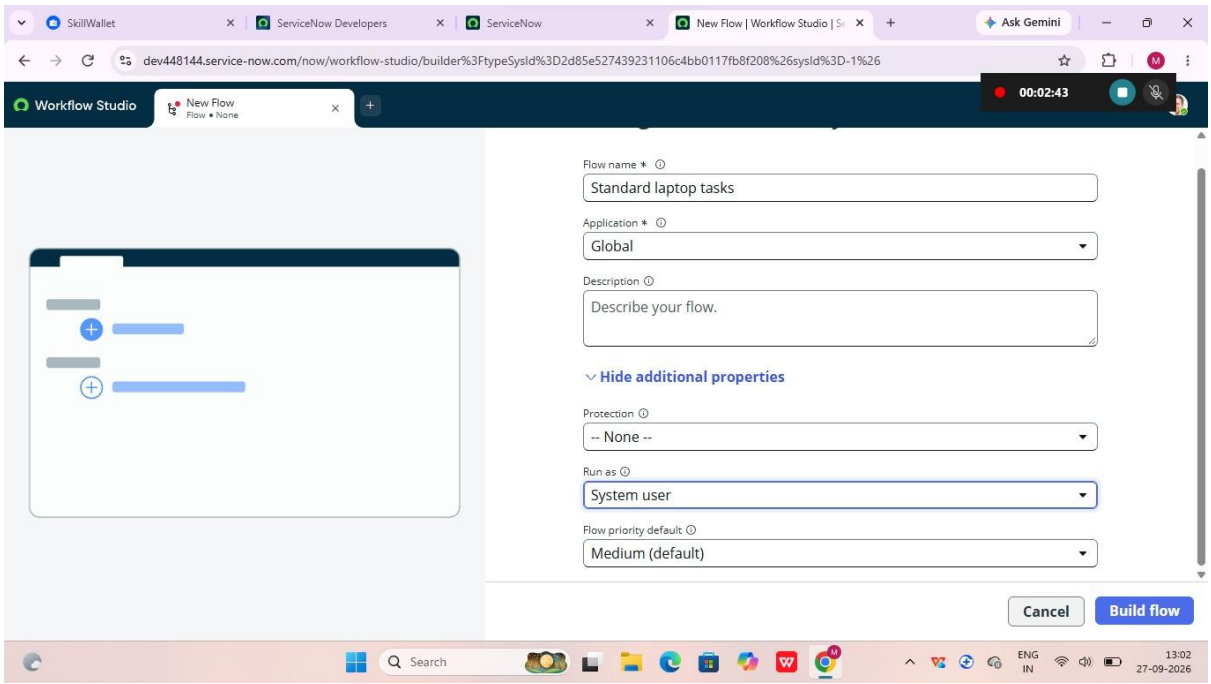

Enter the following details:

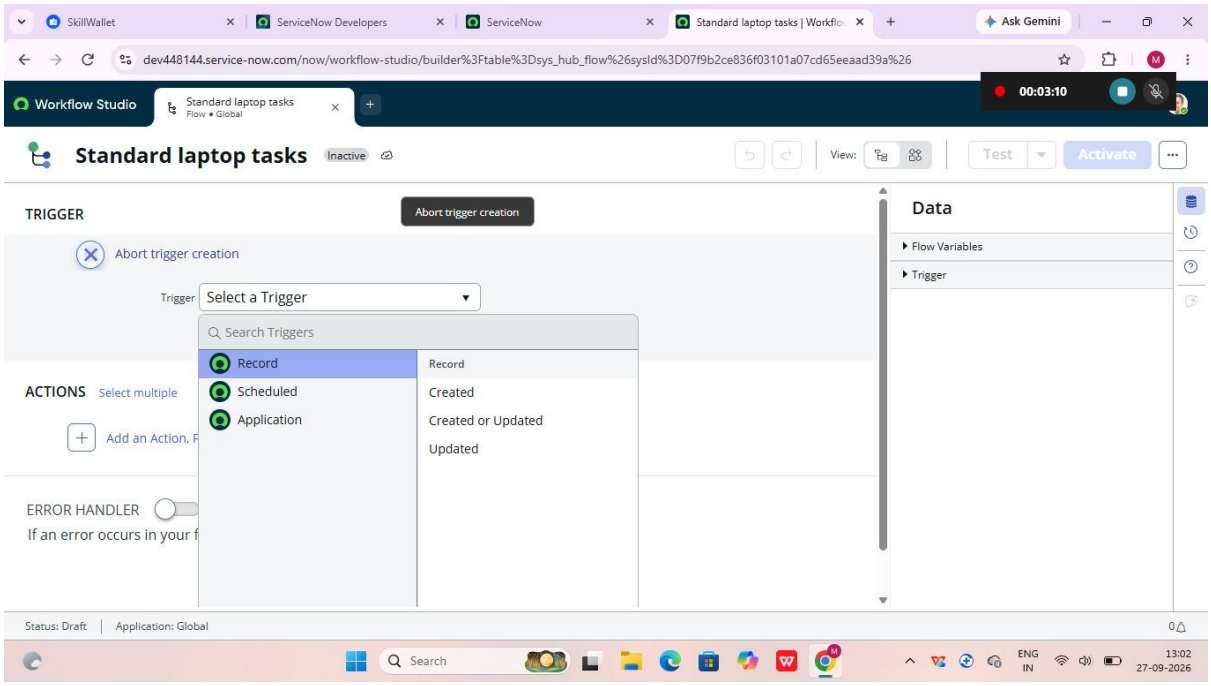

- **Flow Name:** Standard laptop task
- **Application:** Global
- **Run as:** System User

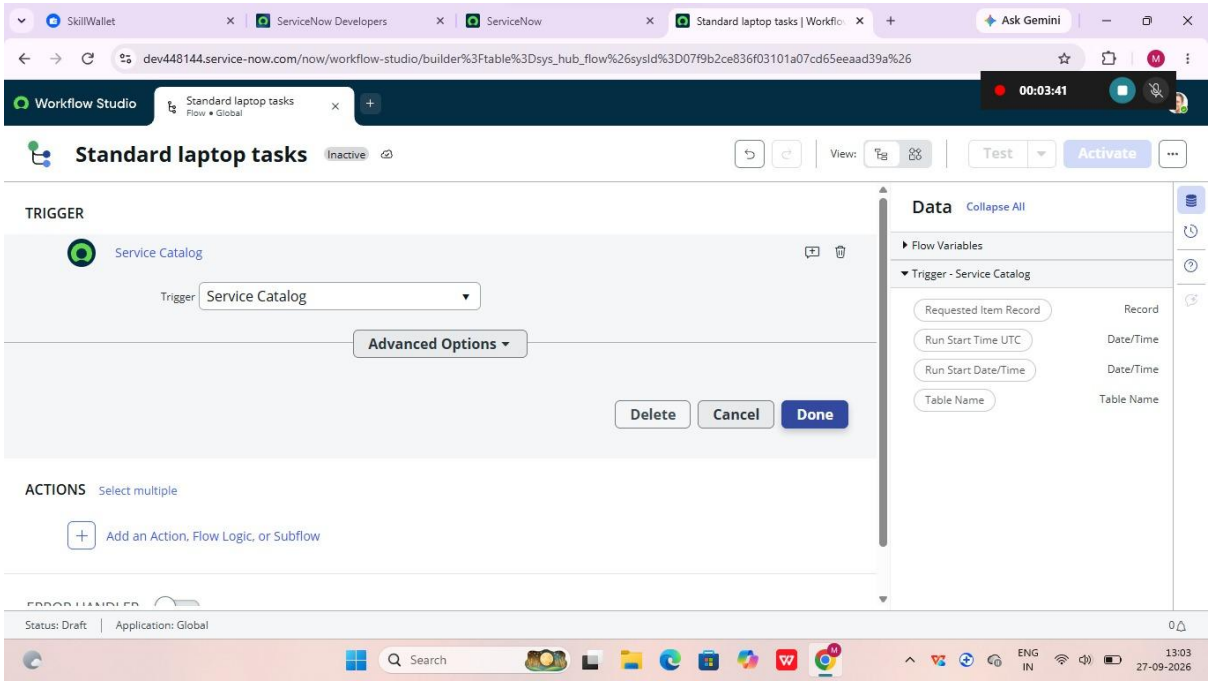

Submit the Flow.

Step 2: Add Service Catalog Trigger

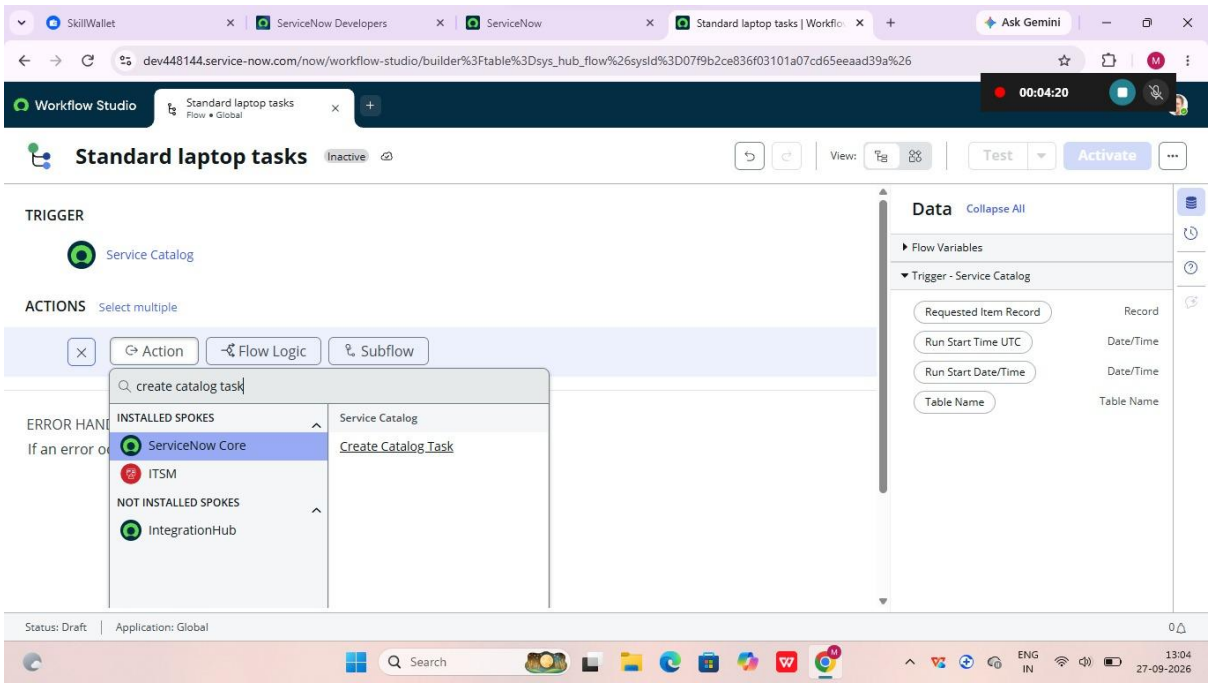

1. Select **Add a Trigger**.
2. Search for **Service Catalog**.
3. Select the Service Catalog trigger.
4. Click **Done**.

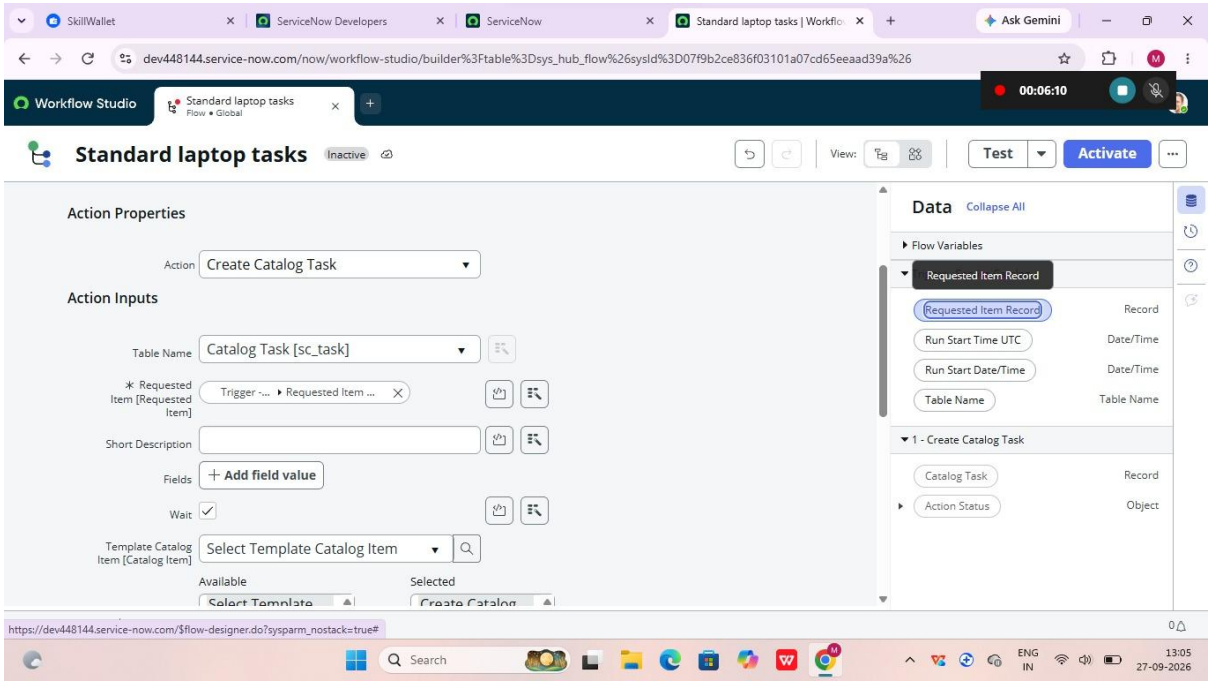

Step 3: Create Catalog Task

1. Select **Add an Action**.
2. Search for **Create Catalog Task**.
3. Select the action.
4. Set the **Requested Item Record** as the Request item.
5. The table is automatically set to **Catalog Task**.

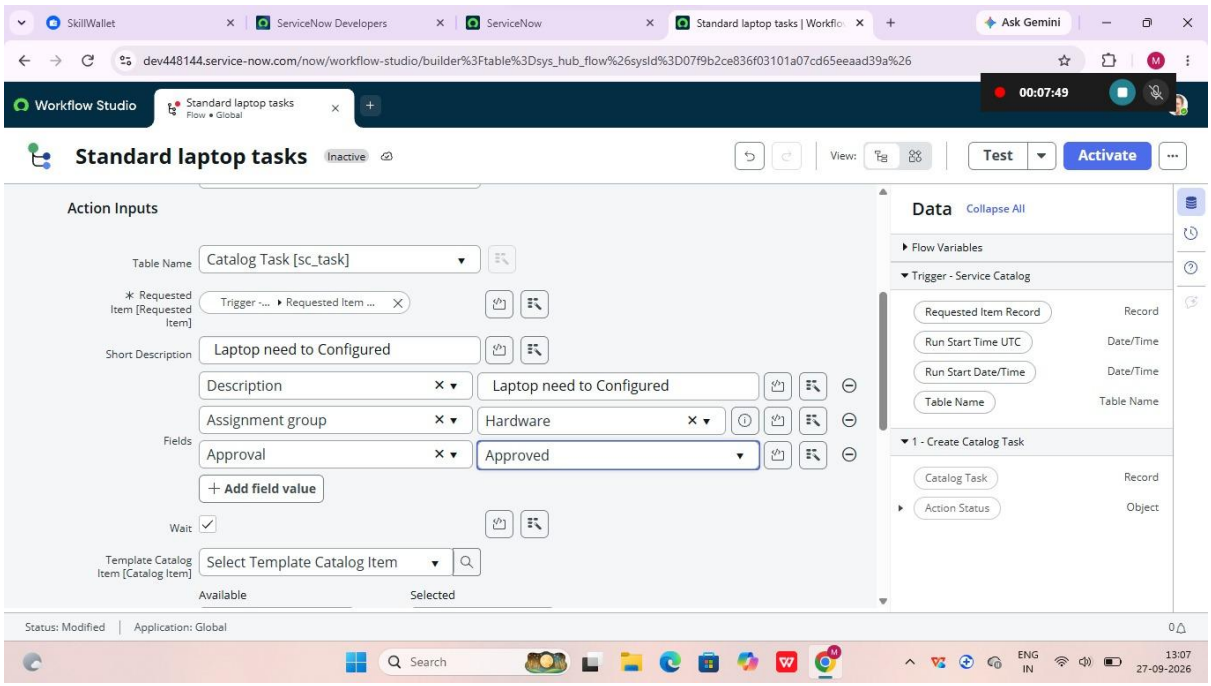

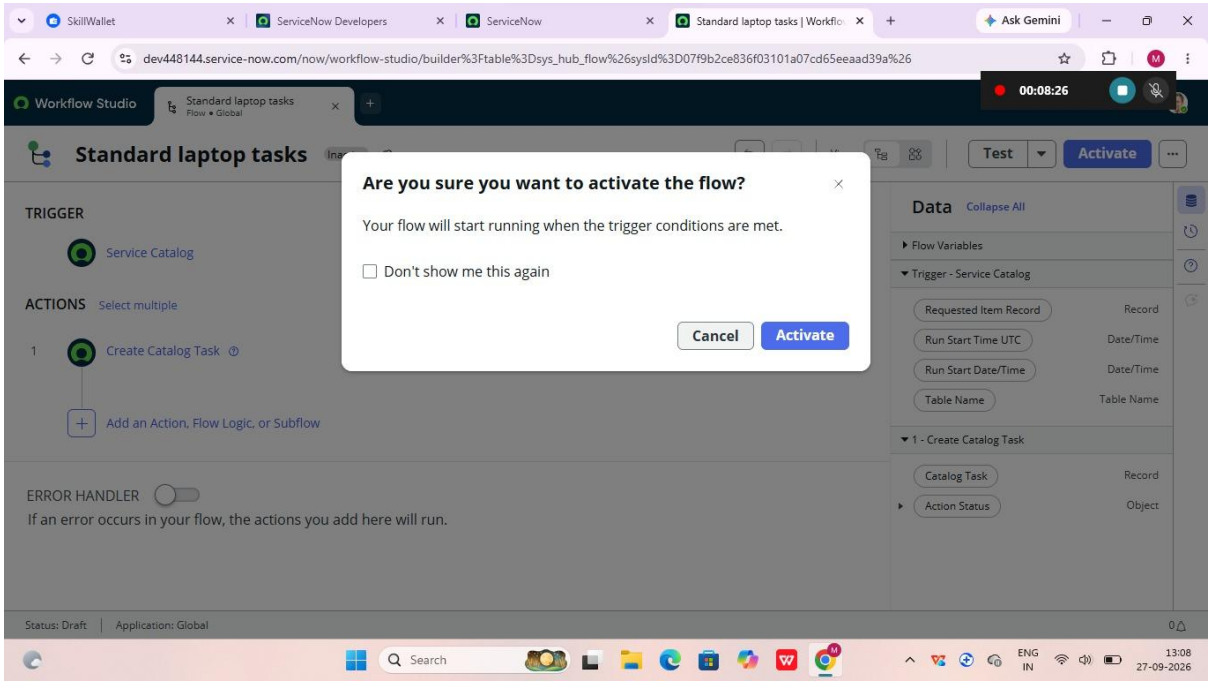

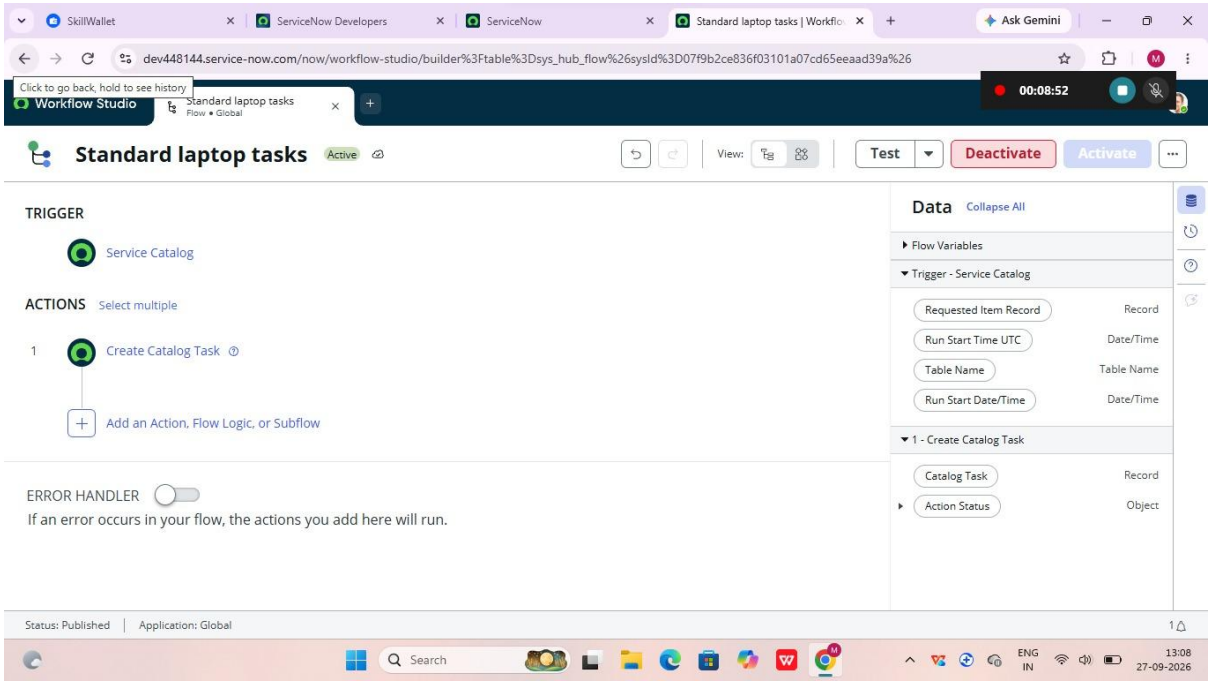

Enter:

- **Short Description:** Laptop need to Configured
- **Description:** Laptop need to Configured
- **Assignment Group:** Hardware
- **Approval:** Approved

Save and activate the Flow.

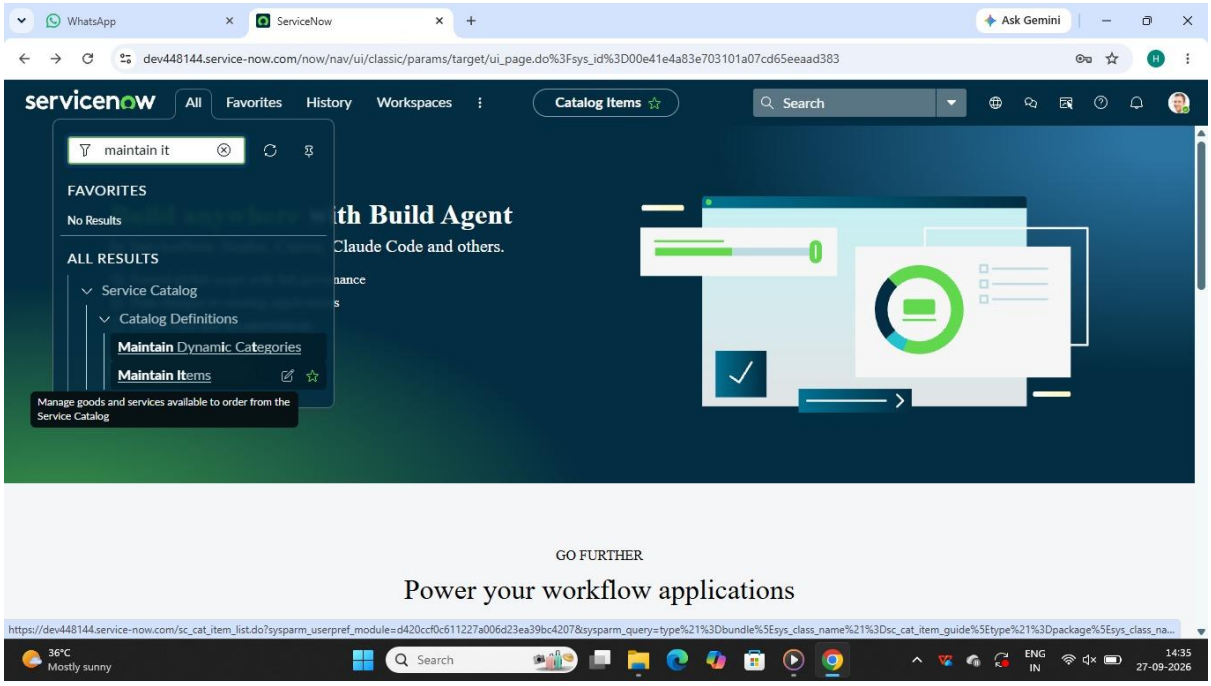

4. Development Milestone 2 – Connecting the Flow

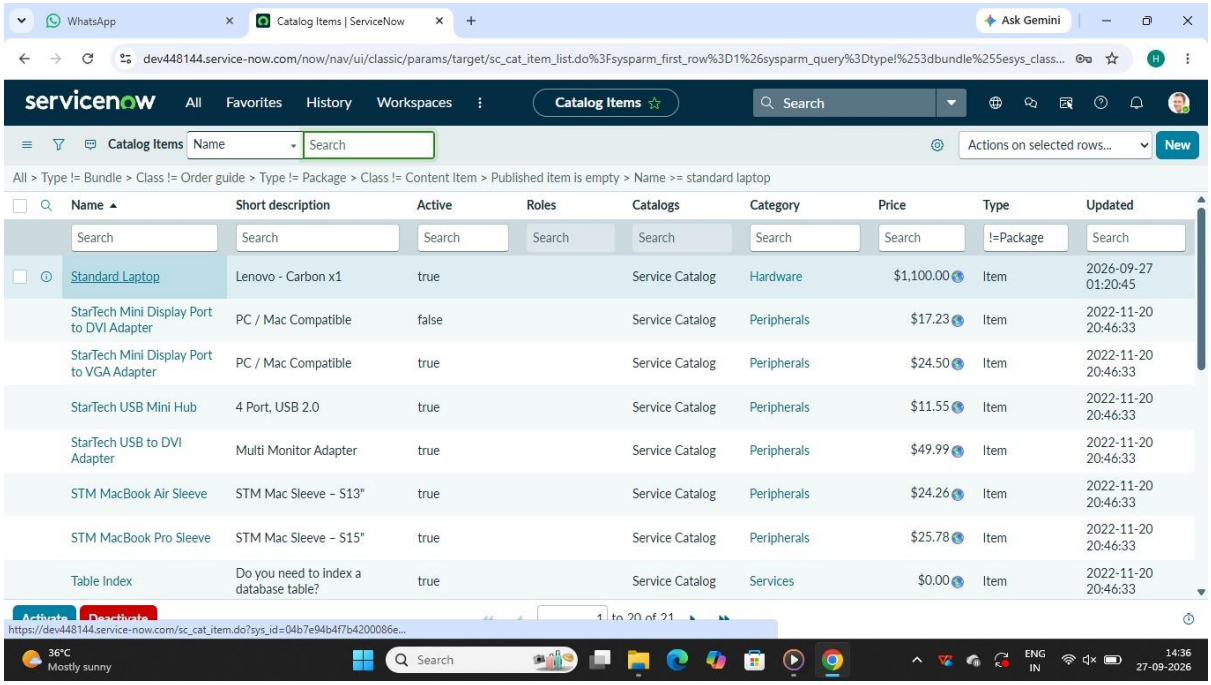

The created Flow is connected to the **Standard Laptop** catalog item.

Steps:

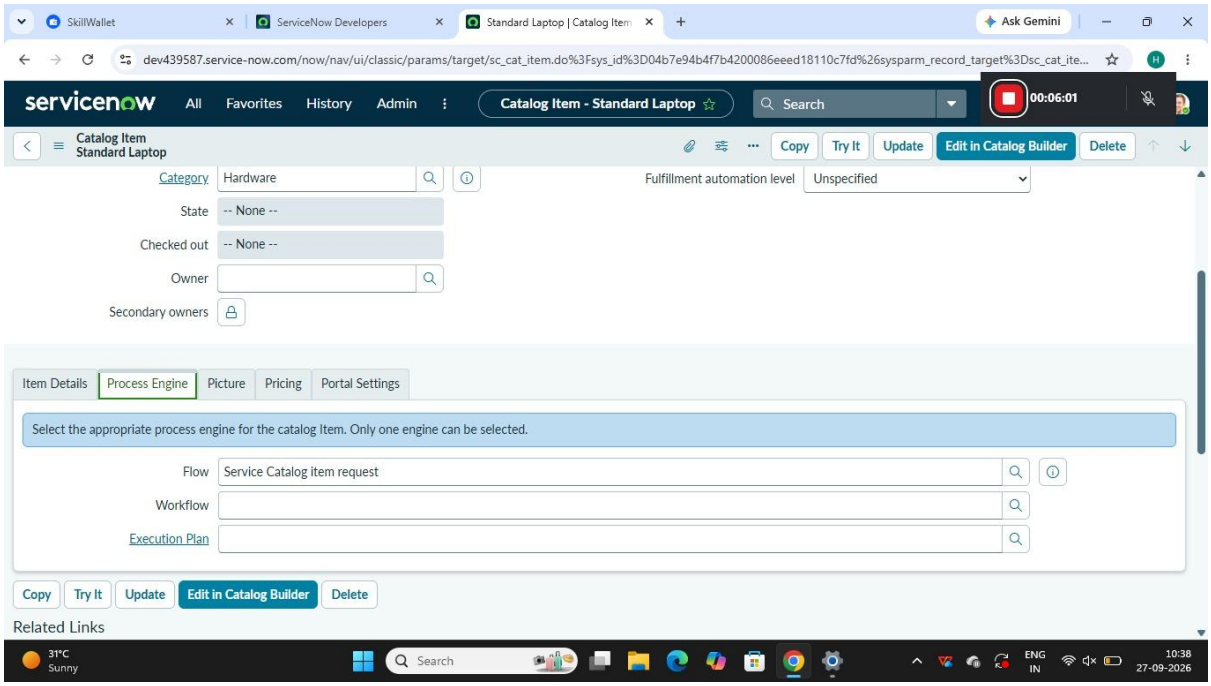

1. Open **All**.
2. Select **Maintain Items**.

3. Open **Standard Laptop**.

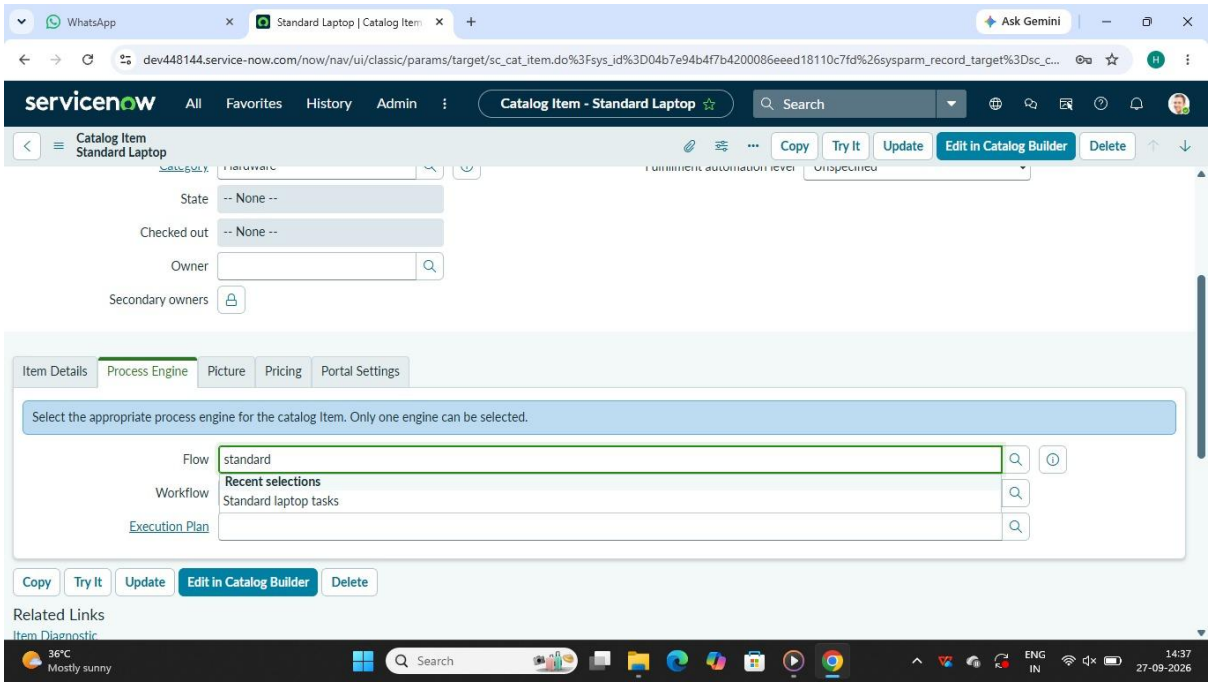

4. Go to **Process Engine**.

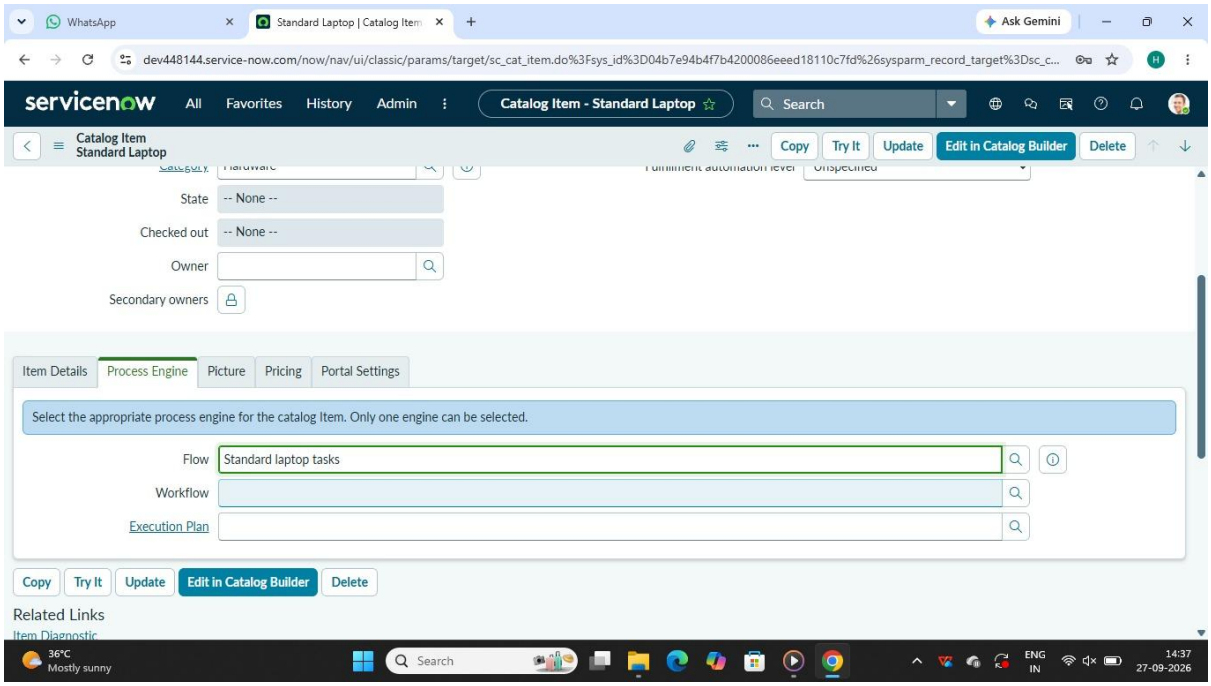

5. Remove the remaining automations if required.

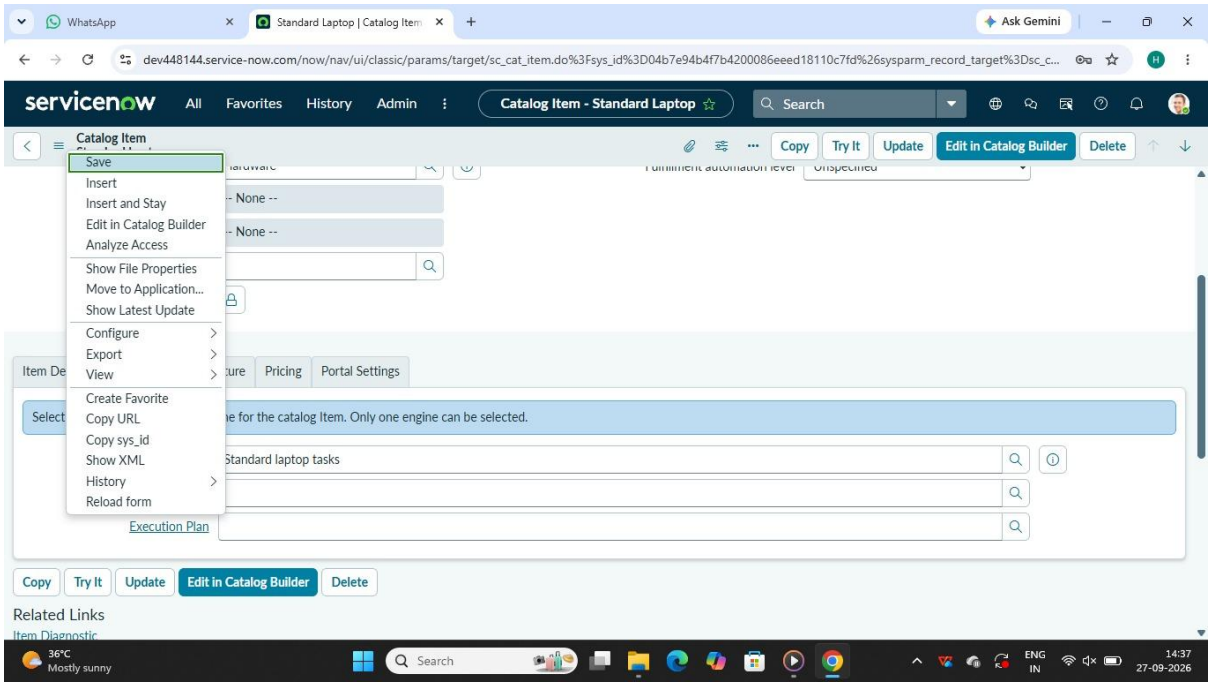

6. Add the Flow.

7. Select **Standard Laptop Task**.

8. Save the changes.

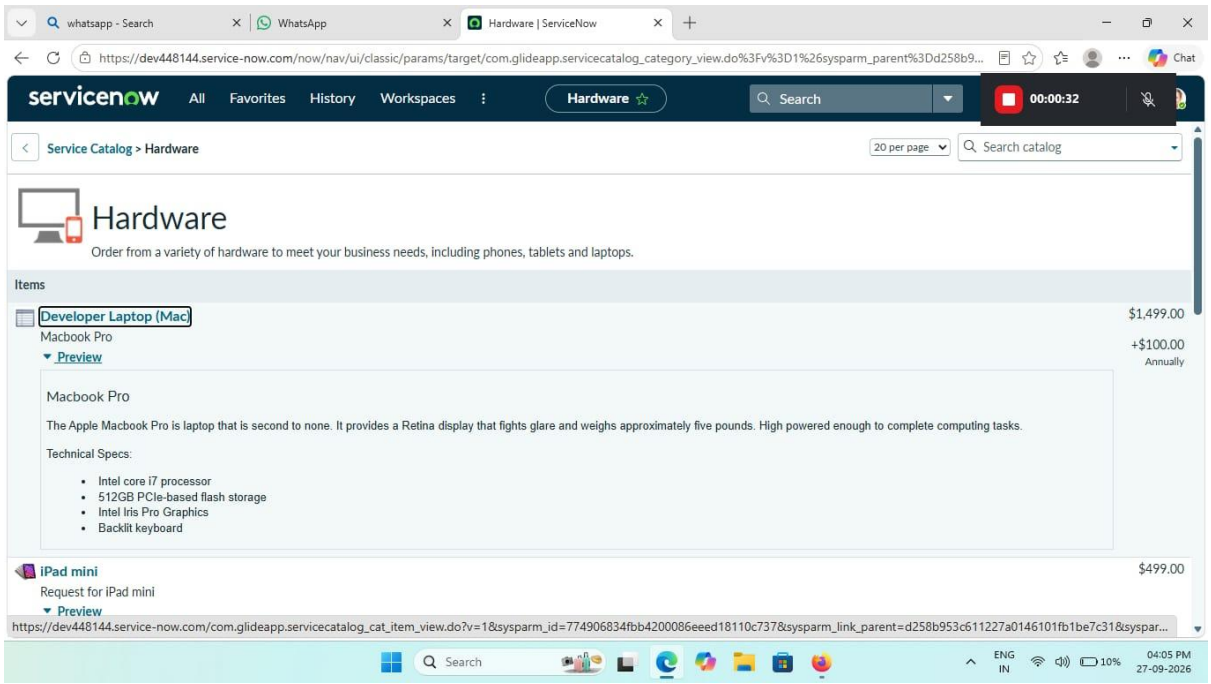

5. Development Milestone 3 – Executing the Process

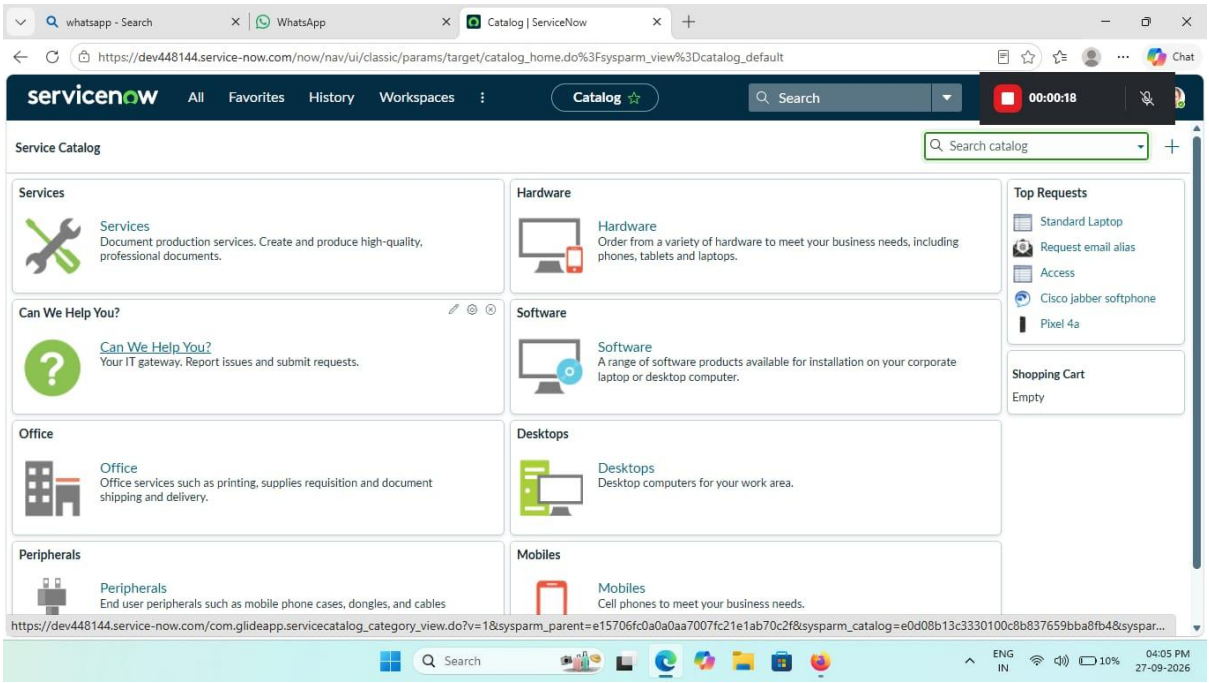

The developed process is executed through the Standard Laptop catalog item.

Steps:

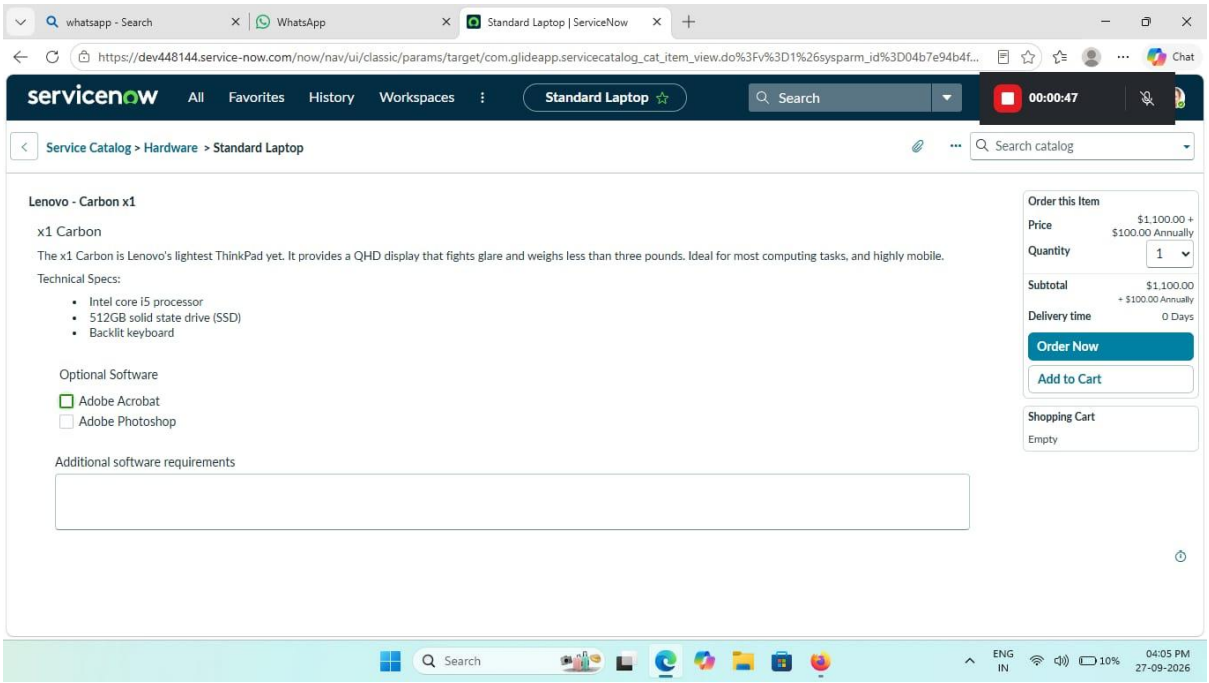

1. Open **Service Catalog**.
2. Select **Hardware**.

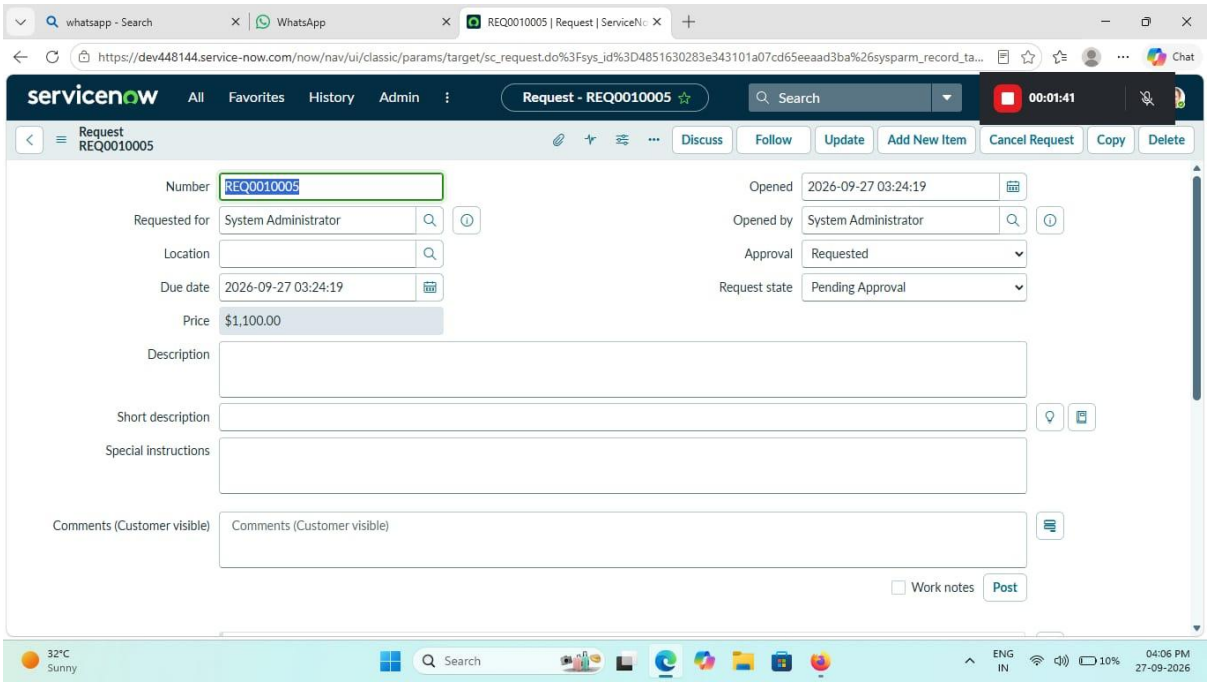

3. Select **Standard Laptop**.

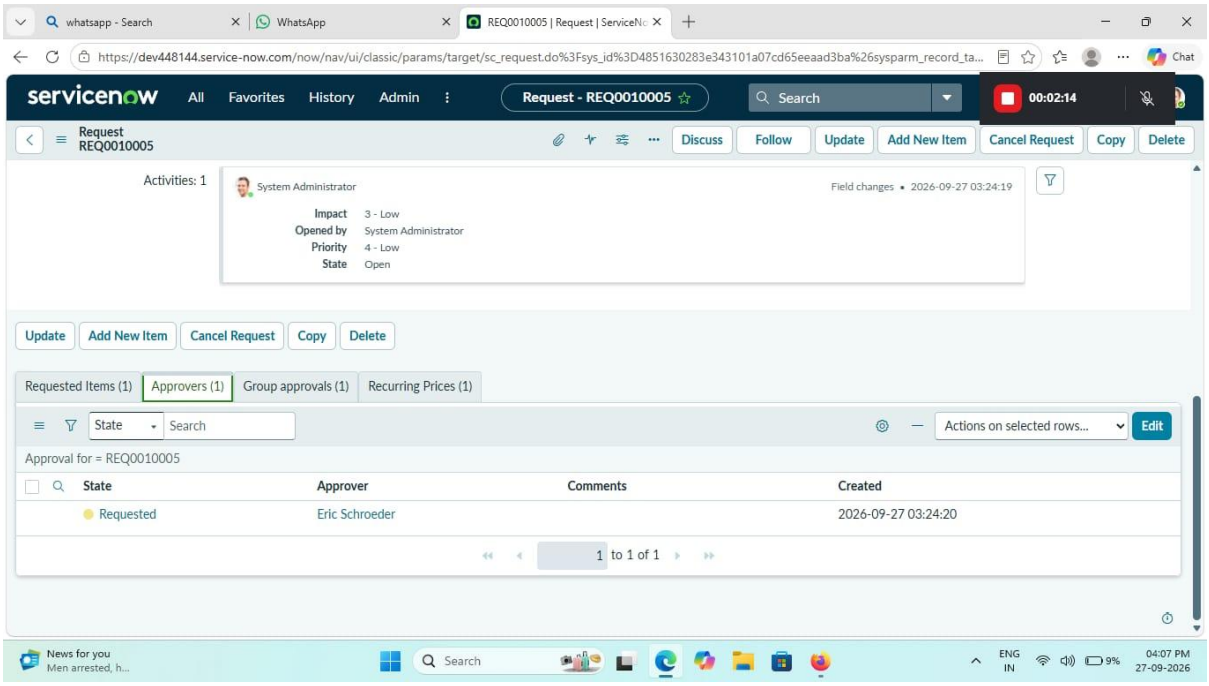

4. Click **Order Now**.

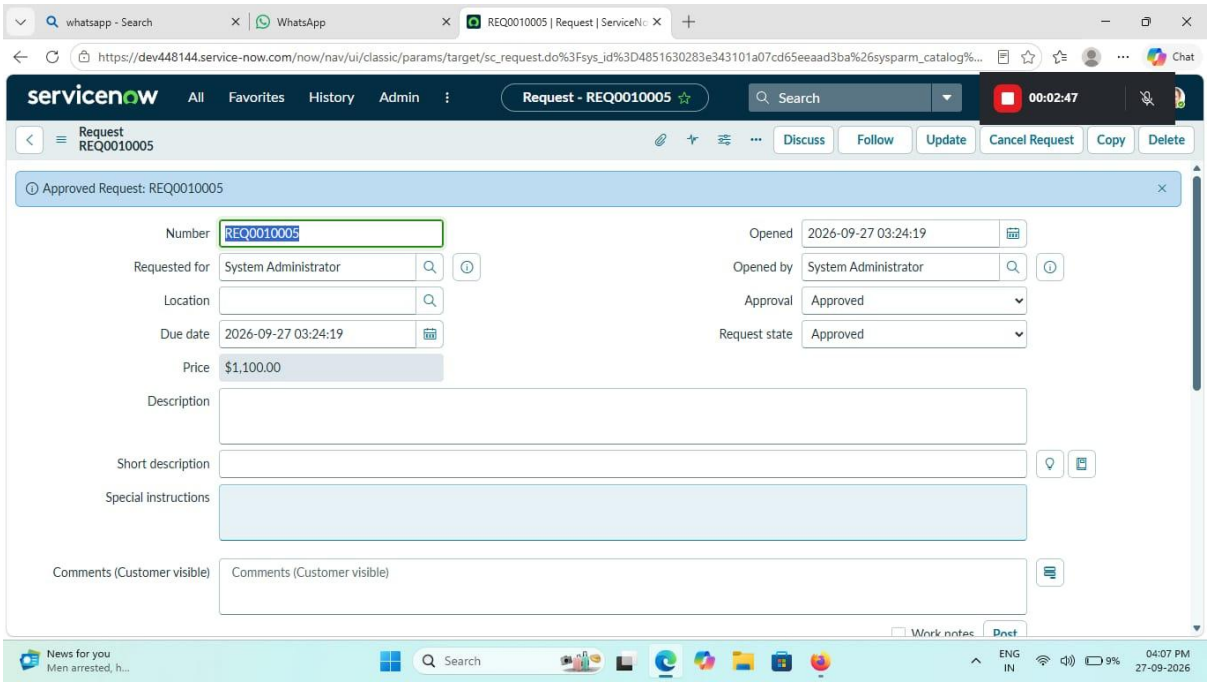

5. Check the order status and request number.

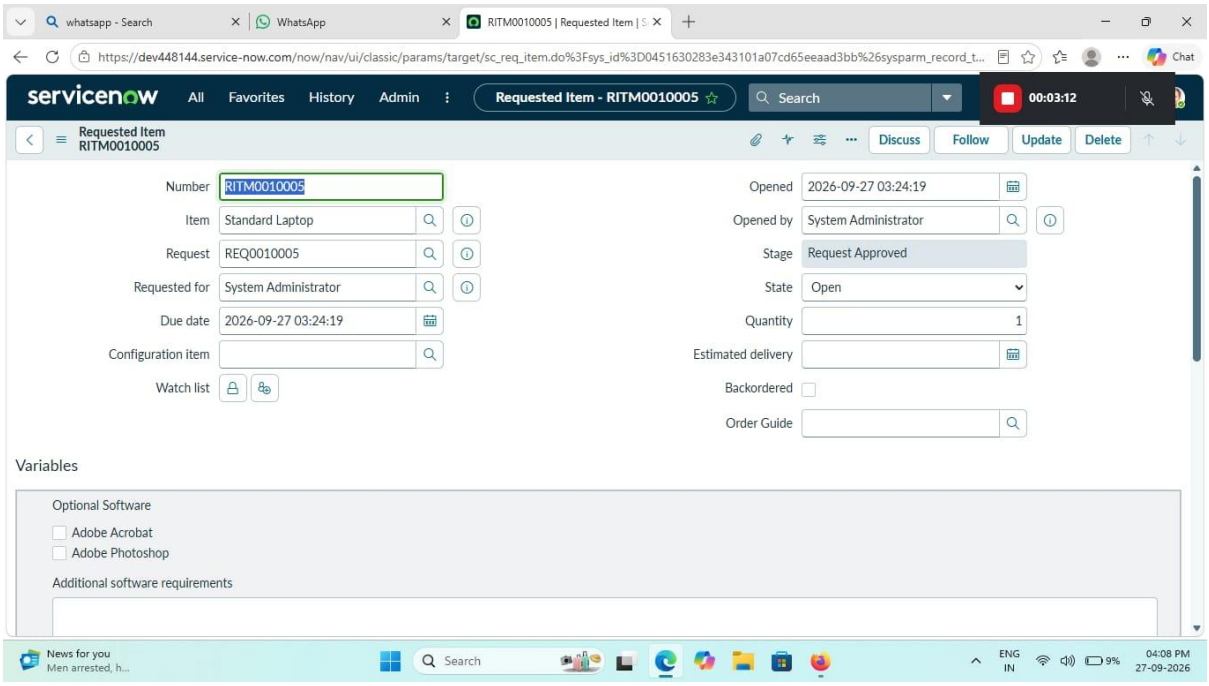

6. Check the Approvers.

7. Approve the request.

8. Open the **Requested Item**.

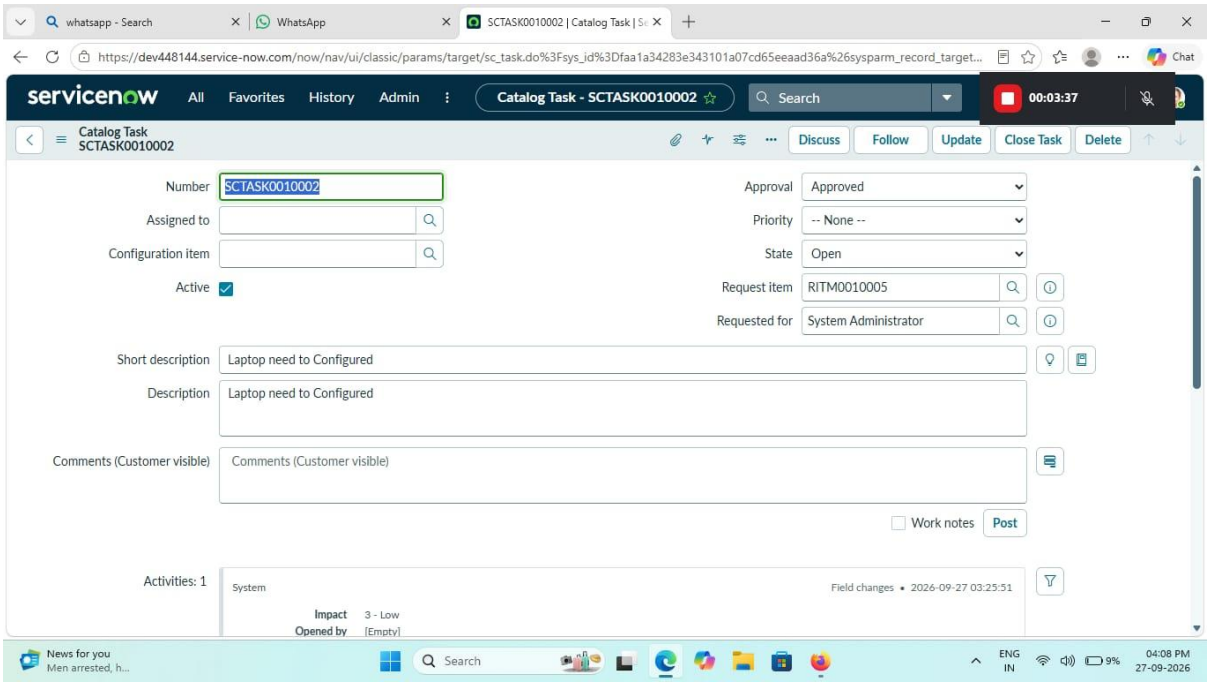

9. Open **Catalog Tasks**.

10. Verify the task status.

11. Verify the short description.

12. Verify that the task is assigned to the **Hardware** group.

6. Development Output

After the development process, an approved Standard Laptop request generates a Catalog Task. The task is assigned to the Hardware group for configuration.

7. Conclusion

The Standard Laptop procurement process is developed using ServiceNow Flow Designer. The Flow automatically creates a Catalog Task after the request is approved and assigns the task to the Hardware group.
