Title: Streamlining It Procurement: Automating Standard Laptop Orders With Flow Designer

PROJECT OVERVIEW

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer is a ServiceNow project that focuses on automating the process of ordering standard laptops. The project uses ServiceNow Flow Designer to create an automated workflow for Standard Laptop requests.

When a user submits a Standard Laptop request, the request goes through the approval process. After approval, the Flow Designer automatically creates a Catalog Task and assigns it to the Hardware team for laptop configuration. This reduces manual intervention, minimizes delays, and improves the efficiency of the IT procurement process.

PROBLEM STATEMENT

The existing IT procurement process lacks efficiency and automation for standard laptop requests. During the procurement process, the laptop configuration task may be overlooked or delayed, which can increase waiting time and require additional manual effort.

Therefore, there is a need for an automated workflow that can create and assign the laptop configuration task to the appropriate team after the request is approved.

USER STORY

As an IT procurement member, I want to streamline the standard laptop ordering process so that the required laptop configuration tasks are automatically created and assigned to the Hardware team. This helps ensure that the configuration work is handled efficiently after the laptop request is approved.

PROPOSED SOLUTION

Use ServiceNow Flow Designer to automate the Standard Laptop request process. After approval, a Catalog Task is automatically created and assigned to the Hardware team.

OBJECTIVES

- Automate the Standard Laptop ordering process.
- Reduce manual work and errors.
- Automatically create configuration tasks.
- Assign tasks to the Hardware team.
- Improve efficiency and productivity

REQUIREMENT ANALYSIS

Functional Requirements:

- Submit a Standard Laptop request.
- Approve the request.
- Automatically create a Catalog Task.
- Assign the task to the Hardware team.

Non-Functional Requirements:

- Easy to use
- Reliable
- Efficient
- Reduces manual effort

SYSTEM DESIGN

PROJECT PLANNING

- **Phase 1:** Brainstorming & Ideation
- **Phase 2:** Requirement Analysis
- **Phase 3:** Project Design
- **Phase 4:** Project Planning
- **Phase 5:** Project Development
- **Phase 6:** Project Testing
- **Phase 7:** Project Documentation
- **Phase 8:** Project Demonstration

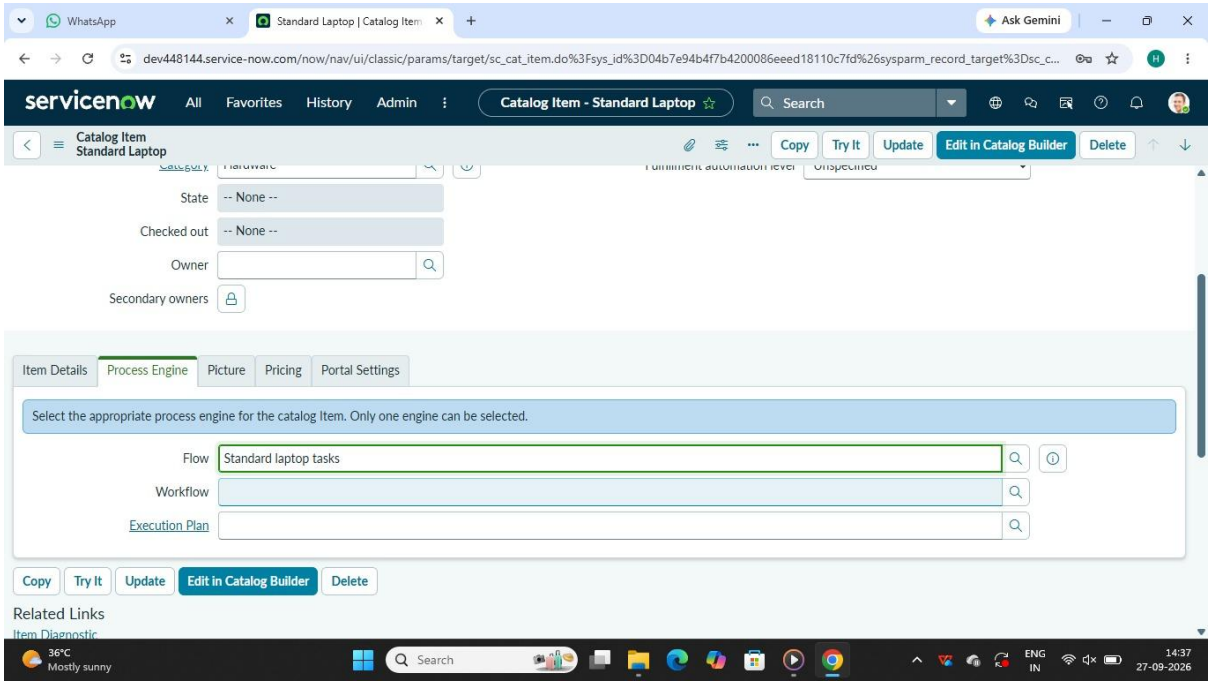

PROJECT DEVELOPMENT

Milestone 1: Create the Standard Laptop Task flow in Flow Designer.

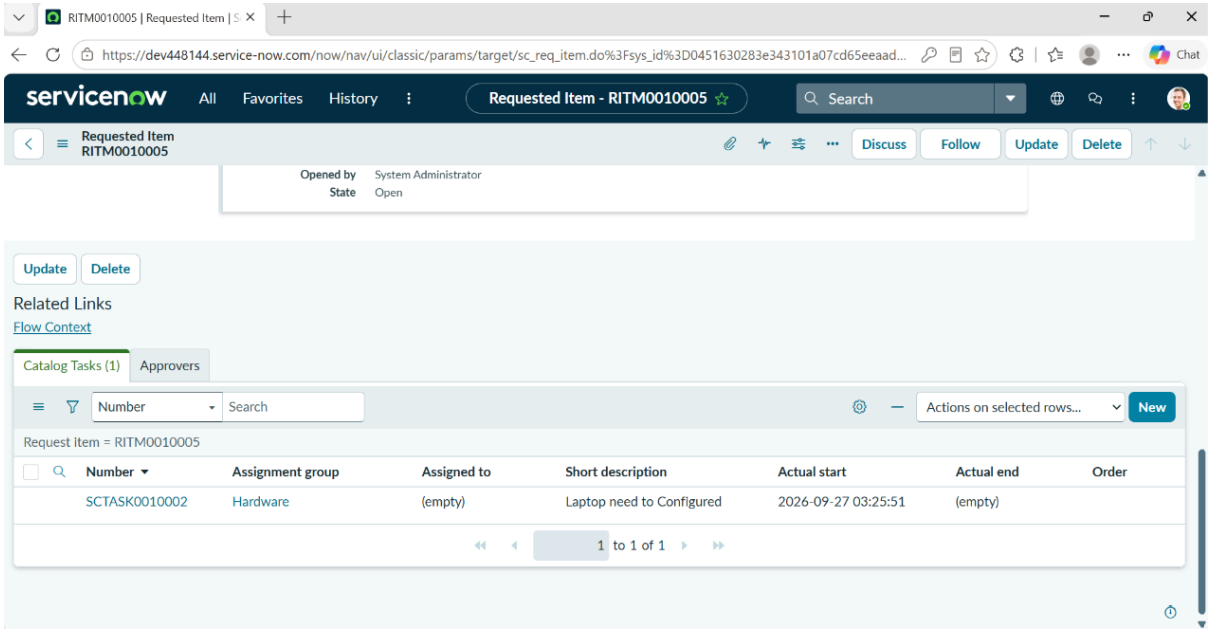

Milestone 2: Connect the flow to the Standard Laptop catalog item.

Milestone 3: Place the laptop order, approve the request, and verify the automatically created Catalog Task assigned to the Hardware team.

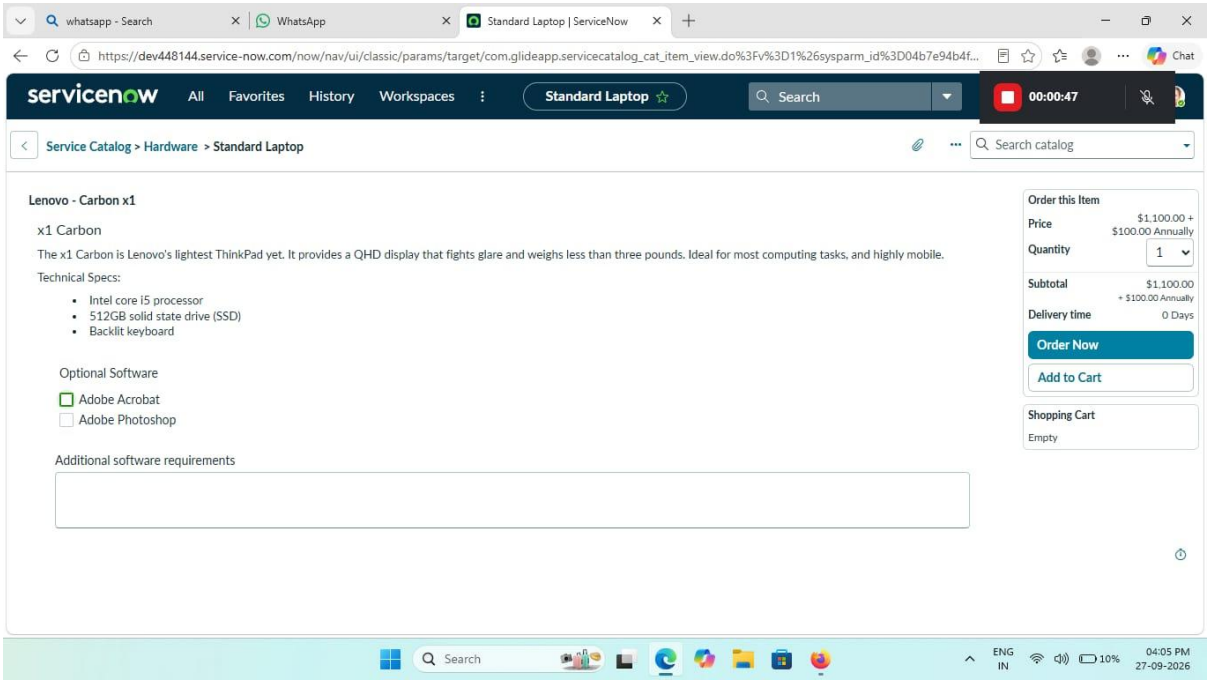

PROJECT TESTING

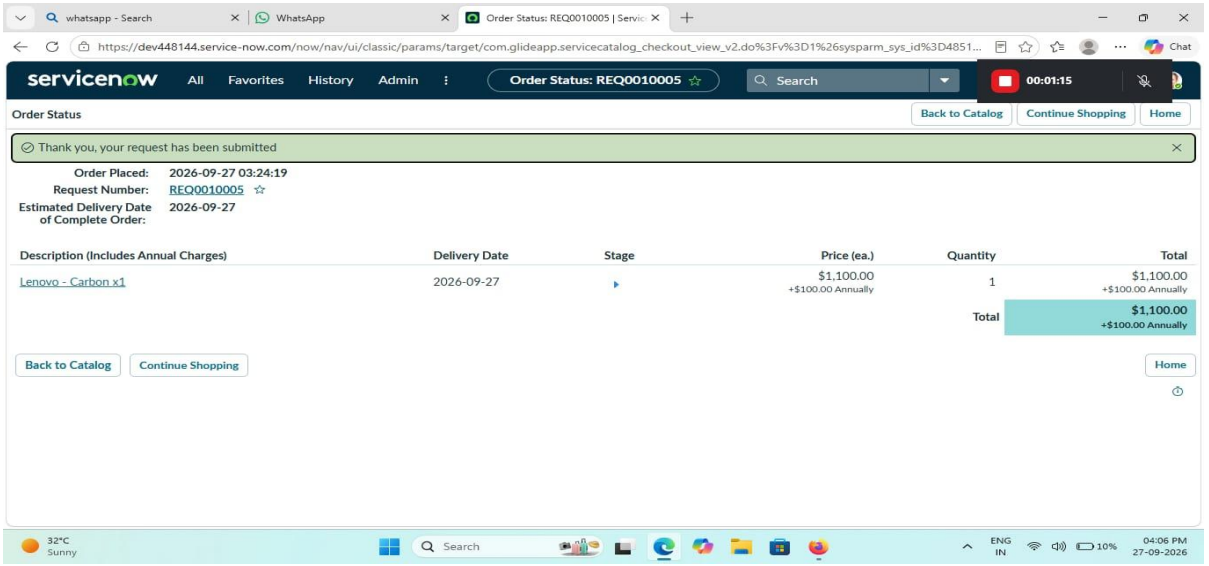

The project was tested by placing a **Standard Laptop** order, checking the approval process, and verifying that the **Catalog Task** was automatically created and assigned to the **Hardware** team.

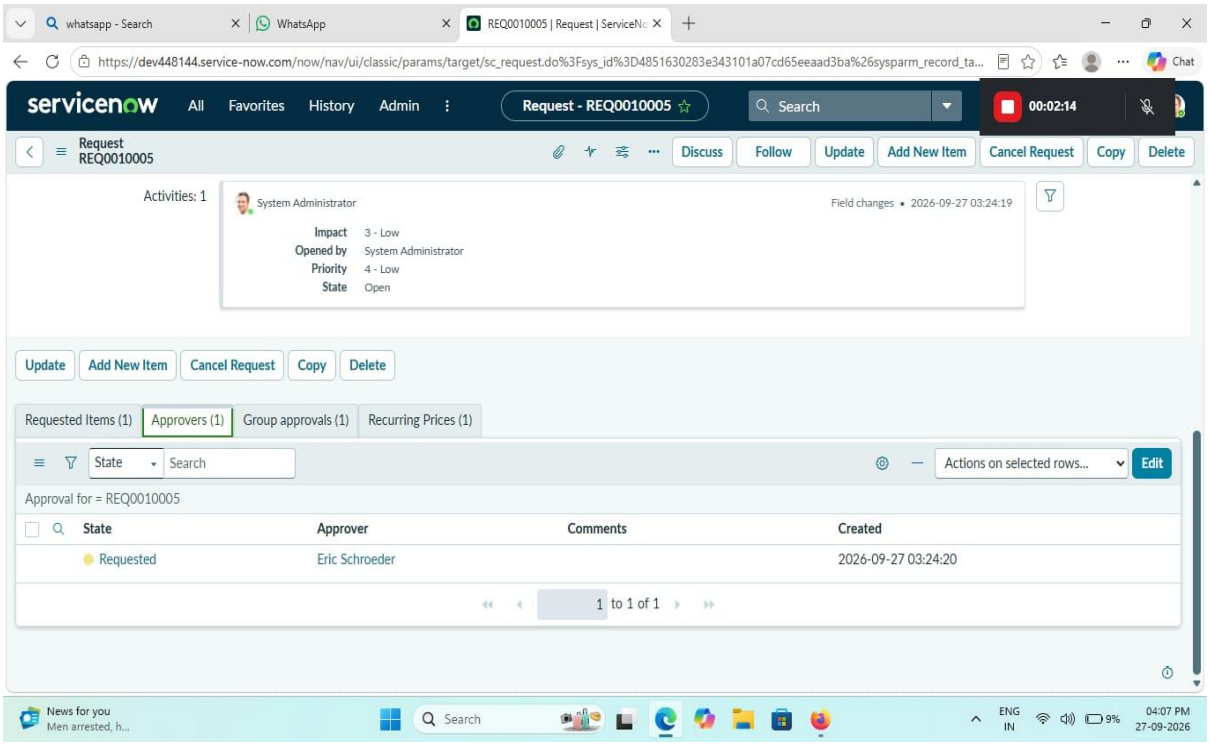

Test Cases:

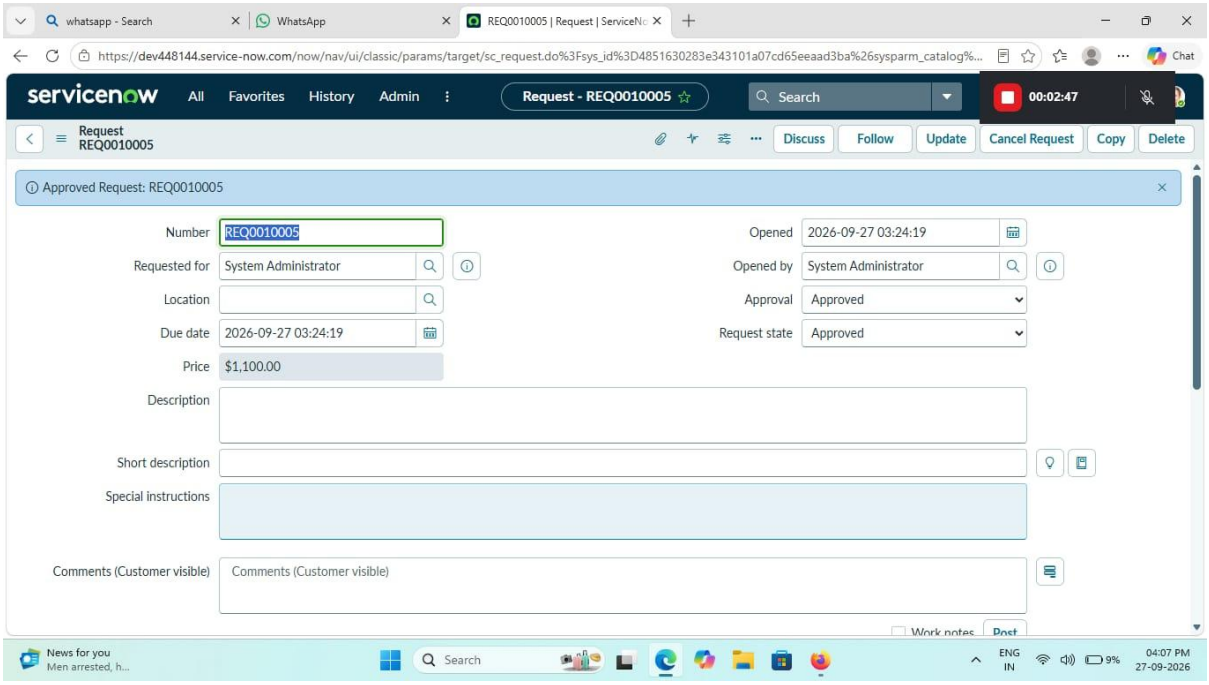

- Standard Laptop Order

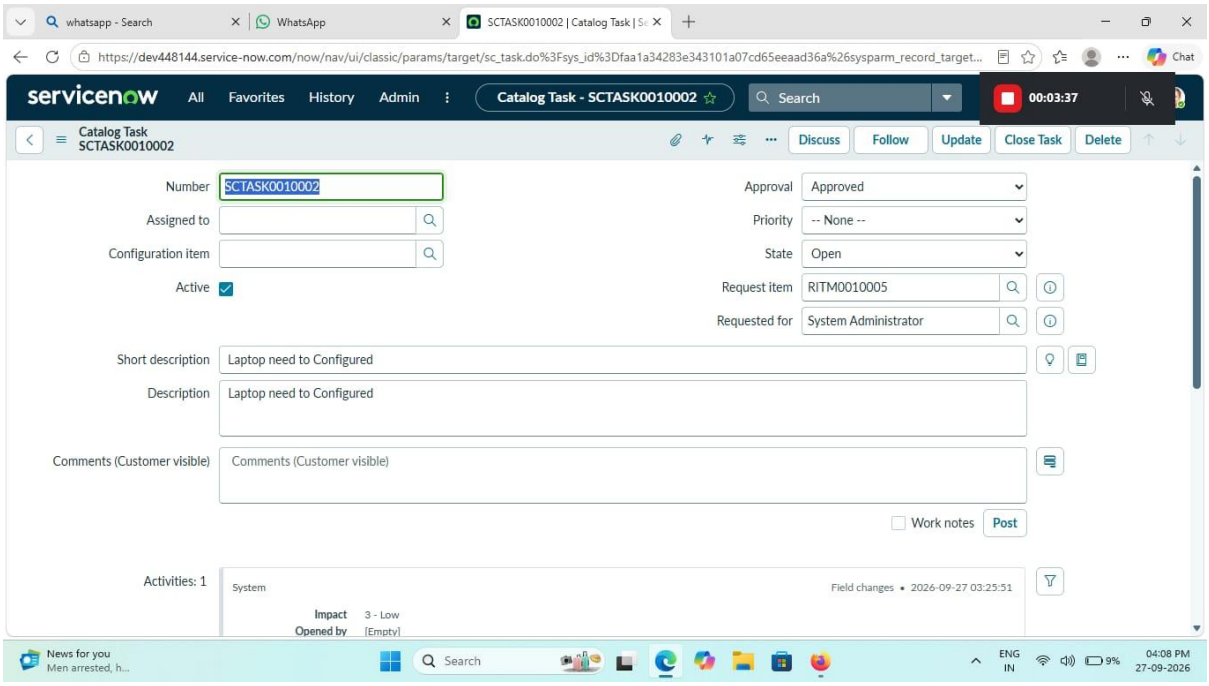

- Request Approval

Post

- Catalog Task Creation

- Task Assignment

- Task Details

Expected Result:

The Catalog Task should be created with the required details and assigned to the **Hardware** group.

FINAL PROJECT OUTCOME

The Standard Laptop request is processed through an automated workflow. After approval, a **Catalog Task** is created automatically and assigned to the **Hardware team** for laptop configuration. This reduces manual effort and helps complete the procurement process efficiently.

CONCLUSION

The project successfully automates the Standard Laptop procurement process using ServiceNow Flow Designer. It reduces manual work, minimizes delays, and automatically assigns the laptop configuration task to the Hardware team, improving overall efficiency and productivity.
